

## Laboratory Coat Washing Service

We have recently set up a lab-coat washing service agreement with the [Department of Comparative Medicine](#) (DCM) at [Medical Sciences Building](#), beginning January 2, 2012. Instructions for use of this service are as follows:

- No coats used with radio-isotopes or chemical carcinogens are allowed. This is a strict rule to protect workers over at DCM - please comply.
- It is advised to write your name(s) on your coats.
- The cost for washing is \$2.00 per coat for a minimum of 8 coats and a maximum of 20 per lab.
- You must use a current DCM account of one of the PI's involved - only one account will be charged for all coats if labs pool coats together.
- If coats are dropped in the morning they can be picked up the same afternoon, otherwise, they will be ready the following day.
- Coats should be taken to [Marilyn Custers](#) at DCM, in one bag, and placed on the floor beside the other dirty laundry bags.
- The person dropping off the coats must fill out their name, date, PI's account number, and number of coats to be washed in a clipboard adjacent to the dirty laundry.
