

LILLY CANADA

INDUSTRIAL PHARMACY RESIDENCY PROGRAM

SPECIALTY IN MEDICAL INFORMATION

Lilly Canada: Who we are

Lilly is a global healthcare leader that unites caring with discovery to make life better for people around the world. We were founded more than a century ago by Colonel Eli Lilly, who was committed to creating high quality medicines that meet people's needs, and today we remain true to that mission in all our work. Lilly employees work to discover and bring life-changing medicines to people who need them, improve the understanding and management of disease, and contribute to our communities through philanthropy and volunteerism.

Lilly Canada was established in 1938, the result of a research collaboration with scientists at the University of Toronto which eventually produced the world's first commercially available insulin. Our work focuses on diabetes, oncology, autoimmunity, neurodegeneration and pain.

At Lilly, our people are the source of all our abilities and successes. Their varied perspectives, experience, and training fuel the creativity and energy needed to pioneer pharmaceutical innovation and help the global medical community.

In 2019, Lilly Canada will be re-locating our head office to The Exchange Tower, 130 King St. West in downtown Toronto.

Medical Information Specialty Residency

Lilly Canada is pleased to provide a one-year medical information residency in partnership with the Leslie Dan Faculty of Pharmacy, University of Toronto for the 2020-2021 year. This opportunity is open to recent pharmacy graduates with an interest in medical information who wish to explore the pharmaceutical industry.

The Medical Information department combines scientific knowledge and communications expertise to deliver relevant medical communications to external customers including healthcare professionals and the people who use our medicines. Further, Medical Information brings therapeutic knowledge and understanding to their cross-functional teams to aid the commercial side of the business, and to provide Medical reviews of promotional and non-promotional materials.

The specific nature of this program allows the resident to touch on therapeutic areas including diabetes, osteoporosis immunology and oncology. The successful candidate will have excellent written and verbal communication skills, be compassionate about customer experience and be eager to learn about industry processes and procedures.

Objectives and Primary Responsibilities:

- Respond to unsolicited written and verbal requests from healthcare professionals and consumers.
- Build partnerships with brand teams to contribute to overall strategy.
- Become proficient at information retrieval by exploring several information databases, both internal and external.
- Review promotional and non-promotional material for medical accuracy.
- Continuously work to develop interpersonal and communication skills.
- Complete one (1) major residency project as outlined by the University of Toronto, Leslie Dan Faculty of Pharmacy.
