

INDUSTRIAL PHARMACY RESIDENCY PROGRAM

Specialty in Medical Affairs

Sanofi Genzyme has pioneered the development and delivery of transformative therapies for patients affected by rare and debilitating diseases for over 30 years. As a Sanofi company, Sanofi Genzyme benefits from the reach and resources of one of the world's largest pharmaceutical companies, with a shared commitment to improving the lives of patients.

Our portfolio of transformative therapies, which are marketed in countries around the world, represents groundbreaking and life-saving advances in medicine, with a focus on rare diseases, dermatology, respiratory and multiple sclerosis. We are dedicated to making a positive impact on the lives of the patients and families we serve. Driven by this commitment to patients, we strive to develop strong relationships with both key opinion leaders and patient communities. By listening to their perspectives, we can truly understand their needs. These collaborations guide us as we continue to push the boundaries of medicine and technology to develop new and better therapies where none existed before. That goal guides and inspires us every day.

Department Description:

The Medical Affairs department plays an important role in providing unbiased and transparent scientific knowledge by acquiring, analyzing, and synthesizing knowledge for aligned Sanofi Genzyme departments such as commercial (including both marketing and sales), regulatory and market access. Responsibilities of Medical Affairs include activities related to investigator and expert outreach, company sponsored non-registration trials, publication planning and Continuous Medical Education. As a key interface between Sanofi Genzyme and the external community (health care professionals, academic thought leaders, public health and government officials), the Medical Affairs team provides insight regarding unmet health needs and potential solutions by communicating the burden of disease, scientific evidence and health economic evaluations of aligned products.

Responsibilities:

Reporting to the Medical Director/Head of Multiple Sclerosis Canada, the Medical Affairs Pharmacy Resident will become an active member of the Medical Affairs team. The resident will assist both Medical Affairs and Commercial Operations by providing medical governance support, education and guidance. This position develops Resident's understanding of the importance of medical governance and operations at Sanofi Genzyme. Particular focus will be on learning and communicating the science of multiple sclerosis; development and execution of Medical Affairs projects; and an understanding of Medical Affairs/Commercial Operations policies and procedures.

Responsibilities of this position include the following:

1. Assist Medical Affairs in the development and execution of local medical initiatives, and participate in cross-functional activities as appropriate
 - a. Support Medical and Commercial initiatives for both current and upcoming products;
 - b. Assist with report writing and preparation of scientific publications and presentations;
 - c. Support the development of presentations and other materials to address customer needs;
 - d. Development an understanding of managing Medical Affairs research projects including health economic models, epidemiological studies, and clinical trials.

2. Support operations and governance duties in Medical Affairs
 - a. Support the Medical Affairs Director in the development and implementation of medical operations and governance processes;
 - b. Support workflow processes including external experts engagement, donations and other financial contributions, and organization of and contribution to events;
 - c. Assist in audit and inspection readiness activities including policy and procedure updates and monitoring of key processes.

3. Administrative support for Medical Affairs
 - a. Organizing departmental and cross-functional meetings (calendar invitations, organizing agendas, meeting minutes, etc.)
