

Sanofi Pasteur, the vaccine division of Sanofi Canada, is the largest company in the world devoted entirely to human vaccines. Sanofi Pasteur Limited, located in Toronto, is one of the company's five major R&D and manufacturing sites. We are home to Sanofi Pasteur's North American center for Analytical and Bioprocess R&D. As well, we are the largest Canadian vaccine producer: each year, we manufacture approximately 50 million doses of vaccine for 20 out of the 26 vaccine preventable diseases and distribute them to more than 90 countries around the world. This variety of activities offers employees diverse opportunities for personal and professional growth. Our company attracts some of the best minds in the business from across the globe. Our 1,400 employees give us their best and we offer the best in return.

## MEDICAL DEPARTMENT DESCRIPTION

The Medical department of Sanofi Pasteur plays an important role in advancing the public health value of current and future vaccines in Canada by articulating the scientific, medical, and public health value of our innovative vaccines and treatments to the external community. As a key interface between the Sanofi Pasteur and the external medical community, the Medical Team is responsible for developing and sharing medical and public health expertise, leading medical and scientific communication activities, engaging and exchanging with external experts, as well as managing lifecycle evidence generation plans to address market access gaps. We bring customer insights of unmet medical and public health needs to the internal Sanofi community in order to develop strategies to enhance the value of existing products and to facilitate the innovative development and delivery of future products.

## RESIDENCY DESCRIPTION

Reporting to the Head of Medical, the **Medical Pharmacy Resident** will become an active member of the Canadian Medical team. Their contributions to Medical, Commercial Operations, and Public Affairs will improve the efficiency and productivity of our local business unit while upholding compliant and ethical standards. This position develops the Pharmacy Resident's understanding of and core competencies in medical strategy, operations, and governance. In particular, they will focus on learning and communicating the science of vaccinology; the development and execution of Medical projects; and the implementation of company policies and procedures.

*Responsibilities of this position include:*

### 1. Support Office-Based and Field-Based Medical Initiatives (90%)

- Contribute to Medical strategic planning for all launched and pipeline products;
- Support the planning, development, and execution of advisory boards and speaker bureaus;
- Develop presentations and information materials intended for internal and external stakeholders;
- Participate in research projects in the areas of health economic and outcomes research, vaccine epidemiology and modelling, and clinical trials; and
- Host internal and external meetings while capturing insights through the meeting minutes and action items.

### 2. Medical Operations and Governance Excellence (10%)

- Responsible for the implementation and training of Medical policies, procedures, and workflows, including but are not limited to the scope of external expert engagements; donations and other financial contributions; events; investigator sponsored studies; promotional and non-promotional material review.
