

GlaxoSmithKline is pleased to offer a one-year pharmacy residency in partnership with the Leslie Dan Faculty of Pharmacy, University of Toronto. This residency is ideal for recent graduates in pharmacy programs with career interest in Medical Affairs within Oncology, Vaccines or Respiratory.

About GlaxoSmithKline

Do more, Feel Better, Live Longer!
RESPECT – TRANSPARENCY – INTEGRITY – PATIENT FOCUS

GSK journey begins and ends with our vision: Focusing where the patient need is greatest and the science is most fertile, we will work to accelerate delivery of innovative new products to patients and make decisions to drive the greatest benefit for all. Our healthcare solutions will enable people to live life to its fullest, allowing them and their communities to prosper. We will challenge ourselves to raise the bar – endeavoring to increase our commercial return, enhance scientific excellence, strengthen customer relationships, tell our story and positively impact our communities. Applying our values to make the right choice, the right decision. Always keeping the patient at the heart of our actions and decisions.

Every second, 30 people around the world are inoculated with a GlaxoSmithKline vaccine; every minute, 1,100 people receive a prescription for one of our products; every hour, GlaxoSmithKline spends half a million dollars on research and development. Would you like to participate in defining the future of the pharmaceutical industry? Then join us in our quest to improve the quality of human life.

Position: Medical Affairs Industrial Resident

Key Responsibilities:

- Be an active member of a therapeutically aligned Medical Affairs team and assist in the development and execution of local medical strategies.
- Contribute to the development and advancement of Medical deliverables by providing scientific support for therapy area products
- Participate on cross-functional therapy area teams, as appropriate, to identify local data gaps.
- Support Scientific Advisors in pooling scientific evidence related to disease area, product situational scan and competitive landscape
- Assist with report writing and coordination of publications and medical writing to support data dissemination activities
- Support the development of fair, scientifically balanced presentations and written materials to address customer needs (sales training, etc).
- Assist with the planning and execution of Advisory Boards
- Advance other projects to support Medical Affairs activities (i.e., issue management, special projects, literature search, formulary submission, etc).
- Leverage medical and scientific knowledge to ensure that all materials produced are medically and scientifically accurate and in compliance with local and GSK requirements
- Administrative support for Medical Affairs team (organizing departmental and cross-functional meetings)
